Tips for getting the best result from your quilt

Backing and wadding must be larger all round than your quilt top. Please make them at least 8" longer and wider (or 4" all round)

Backing needs to have straight edges on all sides.

Quilting will work best on a top which is sitting flat with borders which are not tighter or more loose than the centre.

Avoid the use of very stiff fusible webbing.

Always use quality backing fabric and wadding (natural fibres are best).

KoolKat can provide suitable backing and wadding.

Use registered post for safety when sending your quilt.

Extra charges will apply for basting ric-rac and other items, trimming and joining backings, removing pins and stitching.
